

# **My Hospital Test: Drive-Up Nasal Swab – For Those With Symptoms**

My Hospital Story

**Boston Children's Hospital**

When it's time for the test, a nurse will walk to my car. The nurse will be wearing special clothes. They will look like this.

The nurse will ask some questions. Then the nurse or my caregiver will open my door.

The nurse will put a q-tip into the back of my nose. My nose might feel itchy and uncomfortable, and I might want to sneeze! I can remember to sit still and my test will be over soon.

When the test is over, everyone will be so proud of me for doing such a great job!

# My Hospital Test: Drive-Up Nasal Swab

1

I need to go to the hospital to get a special test before my procedure. We will park in the Patient & Family garage. The attendants will tell us where to park the car. I don't even need to leave my seat!

2
